-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-10 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.

DETAILED ACTION

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Information Disclosure Statement

The information disclosure statement filed November 24, 2003 fails to comply with 37 CFR 1.98(a)(2)(iii), which requires a copy of a pending U.S. application that is being cited in an IDS.

Kurasawa et al (US 2004/0108727 A1), cited by the examiner, corresponds to the listed patent application no. 10/701,487.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

Art Unit: 3747

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 8 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Araki et al (JP 10-018950 A). A multi-part crank bars claimed is defined, for example, by rod 6 and bearings 65 in Figure 1.

Claims 1, 2 and 5-10 rejected under 35 U.S.C. 102(e) as being anticipated by Kurasawa et al (US 2004/0108727 A1). Note the multi-part crank bars in FIGS. 8A, 8B and 8C.

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Araki et al (JP 10-018950 A). Araki et al discloses the claimed invention as stated above except that the crank bar parts are not disclosed as being made of different materials. It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the

Art Unit: 3747

crank bar parts of the starter of Araki et al, since it has been held the selecting a known material for an intended purpose is obvious. See *In re Leshin*, 227 F.2d 197, 125 USPQ 416 (CCPA 1960).

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Araki et al (JP 10-018950 A) in view of Campbell (US 5,233,877). Araki et al discloses the claimed invention as stated above except that the crank bar parts are not disclosed as being hardened. Campbell teaches that it is known to make starter parts that are hardened. See column 2, lines 7-17. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use hardened parts, as taught by Campbell, in the starter of Araki et al, in order to reduce wear.
